## CasaTunes Setup (Cont)

In the **AirPlay** section, decide whether you want to allow music on iOS devices to be played through the Streams.

NOTE: Do Not change the "Enable transmitting CasaTunes music to AirPlay speakers" or **"Always turn off room when the AirPlay stream disconnects"** checkboxes. They have no affect in multi-stream player mode.

You will not be able to play CasaTunes music out to AirPlay speakers when using multi-stream player mode.
You will be able to play music from an iOS device or iTunes to a CasaTunes Stream and then select the rooms, volume and power using the home control system.

Enable all of the music services you are interested in.
Some music services require setting up SqueezeBox. Follow the directions in CasaSetup.

		Manage Music Server
Select Controller	My Music	Update CasaTunes
Sources	▸ Music Services	License
Rooms	Music Searches	Change Time Zone

Music Services

SqueezeBox Settings

- ☐ iPod Classic (No WiFi)
- ☐ iTunes Music
- ☐ iNetCustom
- ☑ SHOUTcast
- ☑ Spotify
- ☑ SqueezeBox (Includes Pandora, SiriusXM, Slacker and more)

Setup an account on http://www.MySqueezeBox.com, then select a your music apps, for example Pandora for use with CasaTunes. See Setup Video and Help for instructions.

Note: You must restart the SqueezeBox server below each time you your music apps.

See which SqueezeBox Apps are supported by CasaTunes.

▽ SqueezeBox Account Information

Some music services require paid accounts, as noted in CasaSetup.

Now, set your Time Zone and Update settings. Click on Advanced Settings and use the Project Information page to create a backup of the project.

Control

Use our control apps.

Download on the App Store

GET IT ON Google play

OR
Go to http://CasaServer/CasaTunes on any PC, or http://CasaServer.local/CasaTunes on any Mac connected to the network

		Change T...

Controller Settings

Select Controller Type: CasaTunes CT

☐ Are you using a CasaTunes CT-3, CT-3S or CTMS-3 music server or streamer?

☑ Configure music server as a multi-stream player?

In the **Sources** section, simply rename the stream(s) from Player 1 (and Player 2 on the CT-2).

A good suggestion might be to name then after the home owner's names, like this:

Built-in Sources	Alison's Music Settings	
Alison's Music ▶	Source name:	Alison's Music
Bill's Music	☐ Hide Source
