

CasaTunes Setup (Cont)

In CasaSetup, click on Sources.

For any source input that CasaTunes supplies a music stream, pick CasaTunes Media Player as the Source type and set the Player Settings to match the audio jack you are using. For example, if you connect the first CasaTunes server stream to the first amplifier Source, click on Player 1 and set **Player Settings** the settings as shown here. For the CT-4, all **Service for source:** **Speakers (Realtek High Definition Audio)** of the streams use the **Speaker for source:** **Speaker Pair 1: (Jack Color: Lime Green)** Speakers (Realtek High Definition Audio). You can assign any CasaTunes Media Player to any amplifier Source. For other source inputs, such as the audio from a set top box, pick "Unknown" as the Source type. Hide sources that are not used.

Enable all of the music services you are interested in.

Some music services require setting up SqueezeBox. Follow the directions in CasaSetup.

Some music services require paid accounts, as noted in CasaSetup.

Now, name all of your sources and rooms and set your Time Zone and Update settings. Check the Hide check box for any Sources or Rooms not used. Click on Advanced Settings and use the Project Information page to create a backup of the project. Use the included guide for setting up Keypads and details on the 6x6 amplifier.

Important! Stop the service, wait and then Start the service after completing setup.

Control

Use our control apps.

OR

Go to <http://CasaServer/CasaTunes> on any PC, or <http://CasaServer.local/CasaTunes> on any Mac connected to the network
